

Cadence Opportunities Fund returned a gross performance of +1.8% in October outperforming the All Ordinaries Accumulation Index by 3.1% for the month. The top contributors to performance during October were Resolute Mining, Westgold Resources, Evolution Mining, Titomic, Netflix, West African Resources and De Grey Mining. The largest detractors from performance were Step One Clothing, Whitehaven Coal and BHP.

Gold and gold mining companies have continued to perform well in October. The gold price was up 4% for the month, while the share prices of Resolute Mining, Westgold Resources and Evolution Mining all rose by more than 10%. In our recent quarterly webcasts, we have spoken about how the share price of gold companies has failed to match the performance of gold itself, even though gold companies are leveraged to the gold price. We believe that part of the good performance of our gold mining company investments in October is the share price essentially playing 'catch up' on the gold price increases that we have seen over the past year.

During October Westgold released their quarterly production figures. The company produced 77koz of gold for the quarter following its merger with Karora and reiterated its guidance to produce 400-420koz for the full year. The company also expects post-merger synergies to reduce all-in sustaining costs per ounce for 2025. Evolution also released their quarterly production figures in October. The company produced 194koz of gold and 19kt of copper, and are on track to meet full year guidance. They also upgraded their FY25 mine cash flow guidance by \$107m due to the recent increases in the gold price.

Fully Franked Year-end Dividend

On 31st October the Company paid its 7.0 cents per share fully franked year-end dividend, bringing the full year dividend to 13.5 cents per share fully franked. This full year dividend equated to a 7.8% fully franked yield or a 11.2% gross yield (grossed up for franking credits) based on the share price of \$1.722 per share on the day of the announcement. Importantly this equated to a 7.1% dividend yield based on the pre-tax NTA of \$1.91 on the day of the announcement, due to the Company shares trading at a discount to NTA. After paying this dividend the fund still has 15.5 cents per share of profits reserves to pay future dividends.

The dividend re-investment plan (DRP) was in operation for this final dividend. The Company will buy-back the shares it issued under the DRP. This buy-back will operate when the CDO share price is trading at a discount to the Pre-Tax NTA. At the time of writing this newsletter, CDO is trading at a pre-tax NTA discount of around 8%.
